Optimal Mowing Heights for Turf Grasses

This chart shows the proper mowing heights for the indicated species of grass common in Florida. Place this card in your grass to find the correct range to mow the grass. Use the colored arrow for the type of grass found in your lawn.

-  Bahia grass (7–17 days*)
-  Bermuda grass (3–5 days*)
-  Carpet grass (10–14 days*)
-  Centipede grass (10–14 days*)
-  Seashore Paspalum (5–10 days*)
-  St. Augustine grass (5–14 days*)
-  Zoysia grass (3–5 days*)

* mowing frequency
