Optimal Sprinkler Heights for Turf Grasses (above grass cut)

When dispensing water, sprinkler heads should be a minimum of 2 inches above the mowed grass height. Place this card in your grass next to the sprinkler head. Select the colored arrow for the type of grass found in your lawn and determine if your sprinkler head is set at the correct height when in the up position.

- Bahia grass
- Bermuda grass
- Carpet grass
- Centipede grass
- Seashore Paspalum
- St. Augustine grass
- Zoysia grass
